EDUCATION

University of California, Berkeley (Fall 2011 - present)
Bachelor of Arts, Computer Science, expected graduation: December 2014

EXPERIENCE

Product Design Intern, Khan Academy (SUMMER 2014)
Web Development Intern, LinkedIn (SUMMER 2013)
- redesigned LinkedIn's internal pattern library tool: DaVinci, a collection of reusable components
- created wireframes and interactive prototypes using Illustrator and InDesign
- submitted code reviews and pushed code daily
- presented at Design Office Hours and for the VP of User Experience
- learned Sass, Dust.js framework, and Javascript

CS 160 Reader, UCB EECS Department (2014-present)
Network Programmer, UCB EECS Department (2012-PRESENT)
- creating new EECS branding and styleguide using SASS
- previously created an app store allowing for easy access to MatLab

Graphic and Web Design Intern, TechValidate (SUMMER 2012)
- made infographics for TechValidate blog content
- created Python script that generates a color-coded SVG map based on a dataset

LEADERSHIP

President, Innovative Design (2013-PRESENT)
- lead UC Berkeley's graphic design and photography club
- delegate tasks to a group of 15 officers
- host events and workshops related to design including CMYK Designathon, a day-long
design competition to rebrand local businesses

Layout Director, BARE Magazine (2013-PRESENT)
- direct the design and layout for BARE, the campus fashion and arts publication

Instructor, Graphic Design Principles DeCal (2014-PRESENT)
Instructor, Intro to Photoshop & Illustrator DeCal (2012-2013)
- teach introductory Photoshop and Illustrator during the course of a semester
- create the lesson plans for each week
- evaluate student assignments

Design Lead, Kairos Society - Berkeley Chapter (2013-PRESENT)
- create a community of designers within Kairos, a society of entrepreneurs
- serve as a design consultant for members of Kairos

Outreach Chair, Berkeley Innovation (2013-PRESENT)
- create marketing materials for Berkeley Innovation
- work on solving a design problem with a small group during the semester
- previously designed a financial planning app for developing countries

PROJECTS

Cal Leadership Award (2013)
- recognizes student leaders with merit-based scholarships

LinkedIn HackDay Finalist (JULY 2012)
- wish.io: a web app that allows you to store a wishlist of items from multiple
stores all in one place with the click of a Google Chrome Extension, allows for
sharing and collaboration with friends, created using Django.

AngelHack Finalist & Pearson API Winner (JUNE 2012)
- AngelCook: a web app that generates recipes based upon the items in your
pantry, created using Javascript

SKILLS

Programming
Python · Java · Ruby · C

Web
HTML5 · CSS3 · SCSS · Javascript · jQuery · Django · Dust.js

Design
Illustrator · InDesign · Photoshop · Wireframing · Prototyping
